

KALAHI-CIDSS JAPAN FUND FOR POVERTY REDUCTION (KC-JFPR) PROJECT BRIEFER

Proponent: Department of Social Welfare and Development (DSWD)

I. Project Objectives

- The grant aims at mitigating the adverse social and economic impacts on the poor of Eastern Visayas sustained during the onslaught of Typhoon Yolanda. It aims to better the lives of the poor by rebuilding the infrastructure and sources of livelihood, providing access to emergency support and early recovery systems and ensuring resilience during future disasters. II.

II. Description

- The Subcomponent A1 of this project is being implemented by the DSWD. This includes reconstruction of selected small-scale infrastructure, including (i) existing community infrastructure financed under KALAHI-CIDSS such as rural access roads, school buildings, health centers, water systems, small irrigation systems, and footbridges, and (ii) recovery of municipal infrastructure investments such as basic water supply restoration, restoration of appropriate sanitation to reduce health risks, solid waste collection and transport, and equipment to clear debris.

III. Coverage

- As of May 2016, a total of 399 barangays in 13 municipalities in the provinces of Eastern Samar, Samar and Leyte are already covered. A total of 114 sub-projects in 148 barangays have been proposed for funding through this grant.
- Out of the total proposed, 94 (83%) sub-projects have already been completed serving 40,058 households, 14 SPs (12%) are ongoing, and 6 SPs (5%) is yet to start implementation.
